Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

As a state we need to look to the future when we invest in energy. Duke is just not doing that and I think we should not be asked to pay more for old technology and dirty energy. Think of your children's future...it is not with coal. Please vote against the rate hike.

Sincerely,

Jeffrey Shuler
